Car inspection

External inspection

Check the rubber seals around the doors for cuts and perishing, the edges of the wheels for 'gutter rash' and the plastic light lenses for oxidising and cracking. Check that all external lights work properly, and inspect the tyre tread faces for legal tread depth and uneven wear (which could indicate poor wheel alignment). Look under the car and inside the wheel wells and door frames, as well as under the boot and bonnet for 'overspray', which is often evidence of previous crash repair. Check for missing badges and mouldings on the body.

Panel fit check - even gaps	
Hail damage check - flat surfaces	
Parking scrapes and scratches check	
Rubber door seals check	
Lenses - cracks and oxidising check	
External lights all working	
Wheels - scrape damage check	Note defects here
Tyres - legal tread depth	
Tyres - even wear across tread	
Tyres - check sidewalls for damage	
Overspray check	
Check paint for colour variation	
Badges & mouldings all present	
Glass free of scratches	
Check wing mirrors for damage	

Underbonnet / Under-vehicle inspection

If you don't know much about cars mechanically, bring someone with you who does for this part of the inspection. Engine bays are potentially hazardous places: don't wear a tie or other loose clothing (or long hair) near a running

systen	e - it could become entrapped in the running belt n. Never remove the radiator cap when the engine is	
hot. Ei	nsure the car is in 'P' with the handbrake applied	
	Check the VIN number under the bonnet matches the rego papers	
	Check the engine number under the bonnet matches the rego papers	
	Check the day and month of manufacture on the compliance plate	Radiator tanks & hoses * Check for leaks or bulging/cracked hoses
	Check for oil leaks	Idle the engine * Rattles or poor idle quality could indicate problems
	Check condition of radiator coolant *Rusty or oily coolant could indicate problems	Oil fume check * Remove oil filler cap with engine idling - fumes
	Check engine oil via dipstick *Correct level	emerging from the engine indicate wear.
	* Thick black oil could indicate poor servicing * Milk coffee-coloured oil could indicate severe mechanical defect	Check under vehicle for oil leaks * Oil often blows back towards the rear
	Check sundry fluid levels: *Brake fluid, clutch master cylinder, power steering	Check under vehicle for sundry leaks * Brake system, transmission, dampers, etc
	Check battery * Terminals corroded?	Check under the vehicle for damage *Look for evidence of impact or scrapes
	* Corrosion nearby? Possible battery acid leak? * Date of manufacture if legible	Check brake condition * Remaining pad material + check condition of discs or drums
	Radiator cooling fins * Check for bent, clogged or damage to core	or discs or drains
Note o	defects here	

neck spare tyre condition	Note defects here
reck spare tyre condition	•
eck tool kit condition Vheel brace, jack, tow hook	
ok for overspray ossible crash damage	
ok for water damage in wheel well	
Passenger compartment	
neck seats & trim for damage	Confirm both keys are present *Lost keys can be very expensive
neck all driver's controls gnition switch, high beam, lights, power mirrors, cabin hting, etc.	Check open/close for all doors * Confirm solid, positive closure
neck audio system Cycle through all functions, insert CD, connect MP3 ayer, etc.	Check all seatbelts * Check buckle engagement and inspect belts for wear or fraying
neck Bluetooth if fitted Confirm phone & music streaming works	Inspect head lining for damage * Check buckle engagement and inspect belts for wear or fraying
neck heating and aircon	Inspect carpet for wear
neck interior lights Dash light + dimmer, map lights, vanity mirror	Check all warning lights on start-up * All should activate - especially airbag, ESC & ABS warning lights (if fitted)
neck wipers & windscreen washers	General interior check * Missing or broken components
neck power window controls Note thumping or scraping noises Use all internal switches	Confirm presence of owner's manual * Check service history
neck central locking Use both key fobs & internal switches	Check function of alarm system * If fitted

Warning: confirm the vehicle is insured before you test drive it. If you have an accident you may be liable for the cost of repairs. Do not drive a vehicle without seeing the certificate of currency, and confirm the excess payable in a crash - it could be thousands. If unsure, phone for a cover note to protect yourself before the test drive. Check for engine noise Check positive handbrake engagement * Rattles/vibrations * Test on a steep hill Check smooth transmission shifting Check cruise control functionality * Rough gear shifts indicate problems * Confirm the cruise engages and disengages properly Check rapid transmission engagement Check gauges * Check P-R, P-D, D-R & R-D - delayed * All should function engagement indiactes problems Check temperature in normal range Check brake pedal * Engine should warm up quickly and remain in the mid-* Pedal must be firm range Check straight braking Check engine cold start * Pulling to one side under brakes indicates problems * Note cold starting problems Check smooth braking Check engine hot start * Vibrations or squeaks/squeals indicate problems * Note hot starting problems Check steering doesn't pull Confirm smooth shutdown * Steering must track straight ahead on smooth, level * Engine should not 'run on' after the ignition is switched off road Check suspension rattles/thumps Confirm energetic cranking on startup * PNote rattles or thumps over bumps * Lethargic cranking could be a battery problem Check smooth steering Assess for vibrations * Steering should feel smooth from lock to lock, * Test at a range of engine speeds with minimal free play straight ahead Note defects here

Consumer protection

Note: Few used cars are perfect. Defects listed above don't necessarily mean you shouldn't buy the vehicle. But they could have a potential impact on the price you are prepared to pay. It's important to assess the fair value of the vehicle inclusive of the cost of repairs (if any are needed). You also need to protect yourself commercially from fraudulent sellers.

What is a fair price for this make & model in average condition for age?

Fair Car Pricing: www.redbook.com.au	Protect yourself against: * Money owing on the vehicle (REVS check) * Buying a repaired write-off * Buying a stolen car * Flood/storm damage * Odometer wind-back
